

# Rantakoski DESIGNS

Rantakoski Designs is a young and spirited company founded by artist Anna Rantakoski to bring art closer to people. With this in mind she started painting interior fabrics by hand, combining decoration and art. Since every fabric has been individually painted by hand, each and every one is unique and vivid with vibrant colours. Next to her own collections, Anna Rantakoski also designs fabrics and products from start to finish with the customer's wishes in mind, perfectly blending with personality and interior of the home.

As nature is a great inspiration for Rantakoski Designs, most of the patterns and colours find their origin from nature's beauty.

This green mind set continues in the choice for ecofriendly fabrics and poison- and heavy metal-free paints that are not harmful to nature and human beings alike. Also the creation process of Rantakoski Designs collections follows strict ecological guidelines. Recycling and economical use of materials and energy are key principals of Rantakoski Designs company culture.

Rantakoski Designs has been featured regularly in Finnish decoration magazines and sells nationwide in Finnish decoration stores. Company cooperates with various interior design companies active in Finland's art and design scene.

# Fabrics

Eco-friendly cotton and linen are the primary materials of Rantakoski Designs fabrics. The first step in the creation of a new painting is wrinkle treatment of each fabric separately. After this process, paints are manually applied by brushes using an ensemble of different colour tones to achieve a rich and warm base – beyond reach of any factory printed fabric.

*Lightly wrinkled surface creates interesting structure for the fabric.*

*Gray background painted in different shades of gray.*

Rantakoski Designs is proud to ensure that each customer will end up with products that are completely unique, each painted individually, one by one, as art should be. For retailers the option exists to have batches made with matching colours.
